The fund is managed by Fundsmith LLP

Objectives and investment policy

The fund's objective is to achieve long-term growth in value, investing in shares of companies on a global basis. The fund's approach is to be a long-term investor in its chosen stocks and it will not adopt short-term trading strategies. The fund aims to invest in high quality businesses which, in the opinion of the investment manager, are those:

- that can sustain a high return on operating capital employed;
- whose advantages are difficult to replicate;
- which do not require significant borrowing to generate returns;
- with a high degree of certainty of growth from reinvestment of their cash flows at high rates of return;
- that are resilient to change, particularly technological innovation;
- whose valuation is considered to be attractive;

The fund will not invest in businesses which have substantial interests in any of the following sectors:

- Aerospace and Defence. Metals and Mining
- Brewers, Distillers and Vintners. Oil, Gas and Consumable Fuels
- Casinos and Gaming. Pornography
- Gas and Electric Utilities. Tobacco

Potential investments are screened in accordance with Fundsmith's sustainable investment policy. Fundsmith evaluates sustainability in the widest sense, taking into account not only the companies handling of environmental social and governance policies and practice but also their policies and practices on research and development, new product innovation, dividend policy, and adequacy of capital investment.

The investment portfolio of the fund will be concentrated, generally comprising between 20–30 stocks. The fund will not invest in other funds, property or derivatives, nor will it undertake stocklending or hedge any currency exposure. The fund will not borrow money, except in unusual circumstances. The fund is actively managed, meaning that the fund manager uses their expertise to select investments to achieve the fund's objective. The fund does not track, and is not managed by reference to any particular benchmark. The fund does not have any specific geographical or sector focus.

An investor, or prospective investor, may buy or sell their shares on demand each business day in the UK. Instructions to buy or sell received before noon will be implemented that day; instructions received after noon or on a non-business day will be implemented at noon on the next business day.

For the Accumulation Shares, the dividends are reinvested in the fund. For the Income Shares, the dividends are paid out to you from the fund.

Risk and reward profile

The risk category reflects the significance of the fund's share price fluctuations based on historical data. As the fund is newly established the categorisation is based on the historical data for a representative portfolio. Historical data may not be a reliable indication of the future risk profile of the fund. The risk category of the fund is not guaranteed and may change over time. Further, the lowest category of risk does not mean risk free.

Generally, the higher the risk category, the greater the potential for higher returns but also the higher the risk of losing money. The fund is in Category 5 reflecting the risks inherent in the fund's investment portfolio, including that of capital losses. The underlying investments are, however, in large companies with shares that are, in most cases, highly liquid.

There are a number of other risks that are not covered by the indicator above. A full description is contained in the prospectus under the heading "Risk Factors". The most material are:

Currency risk: The fund's portfolio is a global share portfolio and many of the investments are not denominated in Sterling. There is no currency hedging in place and the price of shares in the fund may therefore rise or fall purely on account of exchange rate movements.

Concentration risk: The fund generally holds 20 to 30 stocks and so it is more concentrated than many other funds. This means that the performance of a single stock within the portfolio has a greater effect on the price of the shares of the fund.

Operational risk: Failures or delays in operational processes may negatively affect the fund. There is a risk that any company responsible for the safekeeping of the assets of the fund may fail to do so properly or may become insolvent, which could cause loss to the fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The charges for the fund are shown below. The ongoing charges figure is based on the fund's expenses for the year ended 31 December 2018. This includes all costs borne by the fund except for portfolio transaction costs but, because the portfolio turnover is relatively low, these charges should equally be low.

The ongoing charges are used to pay the costs of running the fund, including the fee payable to Fundsmith LLP, which is 0.90% per annum, and certain other costs including marketing and distributing the fund. These ongoing charges reduce the potential growth of the investment. The overall ongoing charges may vary from year to year.

One-off charges taken before or after you invest:

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year:

Ongoing charges	1.05%
-----------------	-------

Charges taken from the Fund under specific conditions:

Performance fee	NONE
