The fund will not concentrate its investments in any one industry sector or country.

The fund is actively managed and the MSCI World TR Index is the benchmark index against which the fund's performance is compared. There can be no guarantee that the fund's performance will match or exceed the performance of the benchmark index. While a proportion of the fund's assets may be components of (and have similar weightings to the index), the Investment Manager may use its discretion to invest a significant proportion of the fund in assets which are not included in the benchmark index or with weightings different to that of the benchmark index.

The fund promotes a combination of environmental and social characteristics, whilst investing in companies with good corporate governance, by assessing metrics on business ethics, corporate governance, the environmental impact of products and services, emissions, effluents and waste, human capital and human rights, and strong environmental or social policies in the supply chain. In light of the investment strategy, the Fund provides disclosures in accordance with Article 8 of the Sustainable Finance Disclosure Regulation (SFDR). The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

1	2	3	4	5	6	7

The fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past.

- The lowest category does not mean a "risk free" investment.

- The risk and reward category shown is not guaranteed to remain unchanged and the categorisation of this fund may shift over time.

- It should be appreciated that the value of shares may go down as well as up.
- Investing in the fund involves investment risks, including possible loss of the amount invested.
- Hedging risk: The value of the fund's investment in derivatives depends primarily on the performance of the underlying asset. A small movement in the value of the underlying asset may cause a large movement in the value of the derivative. There is no guarantee that the fund's use of hedging to protect against changes in currency exchange rates will be successful.
- Liquidity risk: During exceptional market conditions, there may be insufficient buyers and sellers to allow the fund to buy and sell investments readily, which could affect the fund's ability to meet investors' redemption requests.
- Sustainability risk: The Fund is subject to the risk that environmental, social or governance conditions or events may occur that may have a material negative impact on the value of its investments.
- For a more detailed explanation of the risks involved, please see "Risk Factors" in the fund's prospectus available at www.seilernfunds.com.
