GAMCO All Cap Value - Class F USD

ISIN code: LU1216601481

A sub-fund of GAMCO International SICAV

Management Company: Waystone Management Company (Lux) S.A.

OBJECTIVES AND INVESTMENT POLICY

Objective

The Fund's objective is to seek growth of capital. Current income, to the extent it may affect potential growth of capital, is a secondary objective.

Principal Investment Strategy

The Fund will invest its net assets primarily in a broad range of readily marketable equity securities consisting of common stocks, preferred stocks and securities that may be converted into common stocks of United States ("Convertible Securities") companies on an All Cap basis that are listed on a recognized securities exchange or similar market. The Fund may also invest in securities outside the United States.

The Fund seeks to achieve its primary investment objective by making investments based on the Investment Manager's perception of companies that are selling at substantial discounts to their Private Market Value ("PMV"). PMV is the value the Fund's Investment Manager believes informed investors would be willing to pay for an entire company; the sum of its parts, plus a strategic premium in a strategic or financial transaction.

The Investment Manager considers factors such as price, earnings expectations, earnings and price histories, balance sheet characteristics, and perceived management skills along with

changes in economic and political outlooks as well as individual corporate developments or catalysts. The Investment Manager may sell any fund investments that lose their perceived value relative to their PMV at the judgment of the Investment Manager.

The Fund will also invest in financial derivative instruments (contracts between two or more parties whose value depends on the rise and fall of an underlying asset) for hedging, efficient portfolio management or other risk management purposes.

Investment Horizon

This Fund may be most appropriate for investors with a medium to long term Investment Horizon.

Distribution Policy

Class F USD are capitalization shares. Capitalization shares do not make distributions and instead capitalize their entire earnings.

Dealing Frequency

You may buy and sell shares on any full day on which banks are open for normal banking business in Luxembourg and New York.

The Fund is actively managed, which means that the investments are selected at the discretion of the investment manager. The Fund does not track and is not managed by reference to any particular benchmark.

RISK AND REWARD PROFILE

This indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk free investment. Your initial investment is not guaranteed.

This Fund is in risk category 6 because the fund invests in securities that are characterized by high risk as well as the potential for high returns.

The Fund may be subject to risks which are not included in the calculation of the risk-reward indicator associated with the following:

- **Derivatives Risk:** The value of some financial derivative instruments may fluctuate rapidly and could expose the fund to a loss greater than the amount originally invested.
- **Credit and Counterparty Risk:** Issuers of the securities or other instruments in which the Fund invests may be subject to credit difficulties leading to the loss of some or all of the sums invested in such securities or instruments or payments due on such securities

or instruments. The Fund may also be exposed to a credit risk in relation to the financing counterparties with whom the fund trades or place margin or collateral in respect of transactions in derivative instruments and may bear the risk of counterparty default.

- **Non-U.S. Securities Risk:** These securities involve investment risks relating to political, social, and economic developments outside the U.S., and risks resulting from the regulation differences between U.S. and non-U.S. issuers and markets. These risks are more pronounced in emerging markets countries.
- **Foreign Currency Transaction Risks:** These transactions involve trading risks including exchange-rate risk, maturity gaps, interest-rate risk and potential foreign government interference through regulation of local exchange markets, foreign investment, or particular transactions in foreign currency.
- **Convertible Securities Risk:** The fund is exposed to the risk that the issuer of the debt security or preferred stock portion of a Convertible Security may fail to meet its obligations, as well as the performance associated risks of the underlying common stock into which it can be converted.

Additional information on these and other risks associated with an investment in GAMCO International SICAV and the Fund can be found in the prospectus, in the section entitled "Principal Risks".
