

Target Market Determination

T.ROWE PRICE GLOBAL GOVERNMENT BOND HIGH QUALITY FUND - I CLASS

INTRODUCTION

This Target Market Determination (**TMD**) is required under section 994B of the *Corporations Act 2001* (Cth) (**the Act**). This TMD describes the class of consumers that comprises the target market for the financial product and matters relevant to the product's distribution and review (specifically, distribution conditions, review triggers and periods, and reporting requirements). Distributors must take reasonable steps that will, or are reasonably likely to, result in distribution of the product being consistent with the most recent TMD (unless the distribution is excluded conduct).

This document is not a product disclosure statement (**PDS**) and is **not** a complete summary of the product features or terms of the product. This document does not take into account any person's individual objectives, financial situation or needs. Persons interested in acquiring this product should carefully read the PDS for the product before making a decision whether to buy this product.

Important terms used in this TMD are defined in the TMD Definitions at the end of this document. Capitalised terms have the meaning given to them in the product's PDS, unless otherwise defined. The PDS can be obtained by The PDS can be obtained by accessing https://www.eqt.com.au/insto/.

Issuer	Equity Trustees Limited	ISIN Code	AU60ETL44244
Issuer ABN	46 004 031 298	Market Identifier Code	
Issuer AFSL	240975	Product Exchange code	
Fund manager	T. Rowe Price Australia Limited	TMD issue date	06.02.2024
TMD contact details	DDOCompliance@eqt.com.au	TMD Version	1
Fund name	T.Rowe Price Global Government Bond High Quality Fund - I Class	Distribution status of fund	Available / Current
ARSN	672712720		
APIR Code	ETL4424AU		

DESCRIPTION OF TARGET MARKET

TMD INDICATOR KEY

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red/amber/green rating methodology with appropriate colour coding:

In target market	See issuer instructions	Not in target market
------------------	-------------------------	----------------------

INSTRUCTIONS

In the tables below, Column 1, Consumer Attributes, indicates a description of the likely objectives, financial situation and needs of the class of consumers that are considering this product. Column 2, TMD indicator, indicates whether a consumer meeting the attribute in column 1 is likely to be in the target market for this product.

APPROPRIATENESS

The Issuer has assessed the product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market, as the features of this product in Column 3 of the table below are likely to be suitable for consumers with the attributes identified with a green TMD Indicator in Column 2.

INVESTMENT PRODUCTS AND DIVERSIFICATION

A consumer (or class of consumer) may intend to hold a product as part of a diversified portfolio (for example, with an intended product use of *minor allocation*). In such circumstances, the product should be assessed against the consumer's attributes for the relevant portion of the portfolio, rather than the consumer's portfolio as a whole. For example, a consumer may seek to construct a balanced or moderate diversified portfolio with a minor allocation to growth assets. In this case, a product with a *High* risk/return profile may be consistent with the consumer's objectives for that *minor allocation* notwithstanding that the risk/return profile of the consumer as a whole is *Medium*. In making this assessment, distributors should consider all features of a product (including its key attributes).

The FSC has provided more detailed guidance on how to take this *portfolio view* for diversification, available on the FSC website. This guidance only applies where a product is held as part of a diversified portfolio.

Consumer Attributes	TMD Indicator	Product description including key attributes
Consumer's investment objective		
Capital Growth	In target market	The Fund seeks to achieve returns through duration and currency management with a return profile that is less correlated to equity and credit markets. The Fund aims to achieve consistent outperformance against the benchmark by exploiting inefficiencies within the global fixed income
Capital Preservation	Not in target market	market and managing portfolios within a disciplined risk management framework. The Fund is a concentrated portfolio of high-conviction, high-quality investment grade government bonds from liquid sovereign markets.
Income Distribution	In target market	The benchmark is the FTSE World Government Bond Index (AUD Hedged). The Fund typically distributes income on a quarterly basis.
Consumer's intended product use (% of Investable Assets)		
Solution/Standalone (up to 100%)	Not in target market	
Major allocation (up to 75%)	Not in target market	The Fund typically invests in global fixed income such as bonds issued by high quality governments,
Core component (up to 50%)	In target market	government-related entities and government agencies located around the world and in global
Minor allocation (up to 25%)	In target market	currencies. The Fund would typically be considered to have a medium level of portfolio diversification.
Satellite allocation (up to 10%)	In target market	
Consumer's investment timeframe		
Minimum investment timeframe	3	The minimum suggested investment time frame for the Fund is 3 to 5 years.
Consumer's Risk (ability to bear loss) and Return profile		
Low	Not in target market	
Medium	In target market	The Fund is considered medium risk. It would likely be suitable for investors who have a medium risk
High	Not in target market	appetite, can accept a moderate level of volatility and potential losses. The Fund may not be suitable
Very high	Not in target market	for those consumers who are more conservative or low risk.
Extremely high	Not in target market	
Consumer's need to access capital

Definitions

Term	Definition
Consumer's investment objective	
Capital Growth	The consumer seeks to invest in a product designed or expected to generate capital return over the investment timeframe. The consumer prefers exposure to growth assets (such as shares or property) or otherwise seeks an investment return above the current inflation rate.
Capital Preservation	The consumer seeks to invest in a product designed or expected to have low volatility and minimise capital loss. The consumer prefers exposure to defensive assets that are generally lower in risk and less volatile than growth investments (this may include cash or fixed income securities).
Income Distribution	The consumer seeks to invest in a product designed or expected to distribute regular and/or tax-effective income. The consumer prefers exposure to income-generating assets (this may include high dividendyielding equities, fixed income securities and money market instruments).
Consumer's intended product use	e (% of Investable Assets)
Solution/Standalone (up to 100%)	The consumer may hold the investment as up to 100% of their total <i>investable assets.</i> The consumer is likely to seek a product with very high portfolio diversification.
Major allocation (up to 75%)	The consumer may hold the investment as up to 75% of their total <i>investable assets</i> . The consumer is likely to seek a product with at least high portfolio diversification.
Core Component (up to 50%)	The consumer may hold the investment as up to 50% of their total <i>investable assets</i> The consumer is likely to seek a product with at least <i>medium</i> portfolio diversification.
Minor allocation (up to 25%)	The consumer may hold the investment as up to 25% of their total investable assets. The consumer is likely to seek a product with at least low portfolio diversification.
Satellite allocation (up to 10%)	The consumer may hold the investment as up to 10% of the total <i>investable assets</i> . The consumer may seek a product with very <i>low</i> portfolio diversification. Products classified as <i>extremely high</i> risk are likely to meet this category only.
Investable Assets	Those assets that the investor has available for investment, excluding the residential home.
	leting the key product attribute section of consumer's intended product use) -like instruments may sit outside the diversification framework below.
Very low	The product provides exposure to a single asset (for example, a commercial property) or a niche asset class (for example, minor commodities, crypto-assets or collectibles).
Low	The product provides exposure to a small number of holdings (for example, fewer than 25 securities) or a narrow asset class, sector or geographic market (for example, a single major commodity (e.g. gold) or equities from a single emerging market economy).
Medium	The product provides exposure to a moderate number of holdings (for example, up to 50 securities) in at least one broad asset class, sector or geographic market (for example, Australian fixed income securities or global natural resources).

Term	Definition	
High	The product provides exposure to a large number of holdings (for example, over 50 securities) in multiple broad asset classes, sectors or geographic markets (for example, global equities).	
Very high	The product provides exposure to a large number of holdings across a broad range of asset classes, sectors and geographic markets with limited correlation to each other.	
Consumer's intended ir	nvestment timeframe	
Minimum	The minimum suggested timeframe for holding the product. Typically, this is the rolling period over which the investment objective of the product is likely to be achieved.	
Consumer's Risk (abilit	y to bear loss) and Return profile	
estimates the likely numb positive return, liquidity o	tandard Risk Measure (SRM) as an input to the assessment of the risk and return profile of the product, but may not necessarily be the only input used. The SRM ber of negative annual returns for a product over a 20 year period. The SRM may be supplemented by other risk factors, such as the potential size of a negative or r withdrawal limitations, underlying investments with valuation risks or risks of capital loss, the use of leverage or short selling, or otherwise may have complex structures. duct return profile will generally take into account the impact of fees, costs and taxes.	
Low	For the relevant part of the consumer's portfolio, the consumer:	
	 has a conservative or low risk appetite, seeks to minimise volatility and potential losses (e.g. has the ability to bear up to 1 negative return over a 20 year period (SRM 1 to 2)), and is comfortable with a low target return profile. The consumer typically prefers stable, defensive assets (such as cash). 	
Medium	For the relevant part of the consumer's portfolio, the consumer:	
	 has a moderate or medium risk appetite, seeks low volatility and potential losses (e.g. has the ability to bear up to 4 negative returns over a 20 year period (SRM 3 to 5)), and is comfortable with a moderate target return profile. The consumer typically prefers defensive assets (for example, fixed income). 	
High	 For the relevant part of the consumer's portfolio, the consumer: has a high risk appetite, can accept high volatility and potential losses (e.g. has the ability to bear up to 6 negative returns over a 20 year period (SRM 5 or 6)), and seeks high returns (typically over a medium or long timeframe). The consumer typically prefers growth assets (for example, shares and property). 	
Very high	For the relevant part of the consumer's portfolio, the consumer:	
very nigh	 has a very high risk appetite, can accept very high volatility and potential losses (e.g. has the ability to bear 6 to 7 negative returns over a 20 year period (SRM 6 or 7)), and seeks very high returns (typically over a medium or long timeframe). The consumer typically prefers high growth assets (such as high conviction portfolios, hedge funds, and alternative investments). 	

	Definition
Extremely high	For the relevant part of the consumer's portfolio, the consumer:
	 has an extremely high risk appetite, can accept extremely high volatility and potential losses (eg. has the ability to hear more than 7 negative returns over a 20 year period), and seeks to maximise returns (potentially in a short timeframe). The consumer seeks extremely high risk, speculative or complex products which may have features such as significant use of derivatives, leverage or short positions or may be in emerging or niche asset classes (for example, crypto-assets or collectibles).
Consumer's need to acces	s capital
proceeds from this request u proceeds of such a request. taken into consideration in al platforms take to process req	resses the likely period of time between the making of a request for redemption/withdrawal (or access to investment proceeds more generally) and the receipt of nder ordinary circumstances. Issuers should consider both the frequency for accepting the request and the length of time to accept, process and distribute the To the extent that the liquidity of the underlying investments or possible liquidity constraints (e.g. ability to stagger or delay redemptions) could impact this, this is to be igning the product to the consumer's need to access capital. Where a product is held on investment platforms, distributors also need to factor in the length of time quests for redemption for underlying investments. Where access to investment proceeds from the product is likely to occur through a secondary market, the liquidity of d likely realisable value on market should be considered, including in times of market stress.
Distributor Reporting	
Significant dealings	Section 994F(6) of the Act requires distributors to notify the issuer if they become aware of a significant dealing in the product that is not consistent with the TMD. Neither the Act nor ASIC defines when a dealing is 'significant' and distributors have discretion to apply its ordinary meaning. The issuer will rely on notifications of significant dealings to monitor and review the product, this TMD, and its distribution strategy, and to meet its own obligation to report significant dealings to ASIC.
	Dealings outside this TMD may be significant because:
	 they represent a material proportion of the overall distribution conduct carried out by the distributor in relation to the product, or they constitute an individual transaction which has resulted in, or will or is likely to result in, significant detriment to the consumer (or class of consumer).
	In each case, the distributor should have regard to:
	 the nature and risk profile of the product (which may be indicated by the product's risk rating or withdrawal timeframes), the actual or potential harm to a consumer (which may be indicated by the value of the consumer's investment, their intended product use or their ability to bear loss), and the nature and extent of the inconsistency of distribution with the TMD (which may be indicated by the number of red and/or amber ratings attributed to the consumer).
	Objectively, a distributor may consider a dealing (or group of dealings) outside the TMD to be significant if:
