

Target Market Determination

L1 UK RESIDENTIAL FUND - HEDGED AUD CLASS

INTRODUCTION

This Target Market Determination (**TMD**) is required under section 994B of the *Corporations Act 2001* (Cth) (**the Act**). This TMD describes the class of consumers that comprises the target market for the financial product and matters relevant to the product's distribution and review (specifically, distribution conditions, review triggers and periods, and reporting requirements). Distributors must take reasonable steps that will, or are reasonably likely to, result in distribution of the product being consistent with the most recent TMD (unless the distribution is excluded conduct).

This document is not a product disclosure statement (**PDS**) and is **not** a complete summary of the product features or terms of the product. This document does not take into account any person's individual objectives, financial situation or needs. Persons interested in acquiring this product should carefully read the PDS for the product before making a decision whether to buy this product.

Important terms used in this TMD are defined in the TMD Definitions at the end of this document. Capitalised terms have the meaning given to them in the product's PDS, unless otherwise defined. The PDS can be obtained by accessing <https://www.eqt.com.au/insto/>.

Target Market Summary

This product is intended for use as a satellite allocation within a portfolio for a consumer who is seeking medium to long term capital growth and income distribution and has a high risk and return profile for that portion of their investment portfolio. It is likely to be consistent with the financial situation and needs of a consumer with a minimum 5 year investment timeframe and who has limited need for liquidity in their investment (noting the period to satisfy redemption requests is generally up to 325 calendar days once a redemption request is accepted in part or in full but may be materially longer). This product is likely to be suitable for investors who have received personal advice.

FUND AND ISSUER IDENTIFIERS

Issuer	Equity Trustees Limited	ISIN Code	AU60ETL96855
Issuer ABN	46 004 031 298	Market Identifier Code	
Issuer AFSL	240975	Product Exchange Code

APIR Code	ETL9685AU		

DESCRIPTION OF TARGET MARKET

TMD INDICATOR KEY

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red/amber/green rating methodology with appropriate colour coding:

In target market	See issuer instructions	Not in target market
------------------	-------------------------	----------------------

INSTRUCTIONS

In the tables below, Column 1, Consumer Attributes, indicates a description of the likely objectives, financial situation and needs of the class of consumers that are considering this product. Column 2, TMD indicator, indicates whether a consumer meeting the attribute in column 1 is likely to be in the target market for this product.

APPROPRIATENESS

The Issuer has assessed the product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market, as the features of this product in Column 3 of the table below are likely to be suitable for consumers with the attributes identified with a green TMD Indicator in Column 2.

INVESTMENT PRODUCTS AND DIVERSIFICATION

A consumer (or class of consumer) may intend to hold a product as part of a diversified portfolio (for example, with an intended product use of *minor allocation*). In such circumstances, the product should be assessed against the consumer's attributes for the relevant portion of the portfolio, rather than the consumer's portfolio as a whole. For example, a consumer may seek to construct a balanced or moderate diversified portfolio with a minor allocation to growth assets. In this case, a product with a *High* risk/return profile may be consistent with the consumer's objectives for that *minor allocation* notwithstanding that the risk/return profile of the consumer as a whole is *Medium*. In making this assessment, distributors should consider all features of a product (including its key attributes).

The FSC has provided more detailed guidance on how to take this *portfolio view* for diversification, available on the FSC website. This guidance only applies where a product is held as part of a diversified portfolio.

Consumer Attributes	TMD Indicator	Product description including key attributes
Consumer's investment objective		
Capital Growth	In target market	The Fund will seek to deliver this return through exposures over the long term primarily in residential property throughout the United Kingdom. The objective of the Fund is to deliver a target internal rate of return of 10% p.a. (net of fees and expenses, before tax) over a rolling 5 year period. As part of this target, the Fund has target average distribution yield of approximately 3-4% p.a. (net of fees and expenses, before tax). Distributions are intended to be paid semi-annually out of the proceeds of net rental income and profits from sales of Properties, if any, received from underlying investments of the Fund.
Capital Preservation	Not in target market	The Fund will initially offer Units denominated in Australian dollar currency (unhedged and hedged) (referred to as the Hedged AUD Class and Unhedged AUD Class) and Great British Pound currency (referred to as the GBP Class). As the Fund invests primarily in UK residential property, a rise in the Australian dollar relative to the British Pound, may negatively impact investment values and returns. Where some or all of this risk may be hedged (Hedged AUD Class only), the hedge may not provide complete protection from currency movements.
Income Distribution	In target market	The Fund is likely to borrow (maximum of 68% of the Fund's gross assets at the time of borrowing) to partially fund acquisition of residential properties, to enhance net returns for investors and to satisfy withdrawal requests. Borrowings may also be partly used to meet the cost of improvements or refurbishment of any of the existing investments. However, borrowing also enhances the potential for reductions in distributions and/ or capital losses in the event that property values fall or rental property income reduces. Investors should therefore have a higher risk tolerance than if the Fund were not geared. Investments in the Fund are generally subject to risks, including possible delays in the payment of withdrawal proceeds and loss of income and/or capital.
Consumer's intended product use (% of Investable Assets)		
Solution/Standalone (up to 100%)	Not in target market	Investors seeking to invest in the UK residential property market as part of a broader portfolio for the long term. The Fund offers exposure to the property asset class primarily the UK residential property. Therefore, the portfolio diversification has been assessed as Low. The Fund is appropriate for consumers who are intending to use the product as a satellite allocation to spread this risk across a broad portfolio of investments.
Major allocation (up to 75%)	Not in target market	
Core component (up to 50%)	Not in target market	
Minor allocation (up to 25%)	Not in target market	
Satellite allocation (up to 10%)	In target market	
Consumer's investment timeframe		
Minimum investment timeframe	5	The minimum suggested time frame for investing in the Fund is 5 years. Residential property by its nature is an illiquid asset class. While investors have a limited right to withdraw from the Fund, this is not guaranteed, and requests may be scaled back.
Consumer's Risk (ability to bear loss) and Return profile		

Low	Not in target market	<p>The Fund is considered high risk. It would likely be suitable for investors who have a high risk appetite and can accept higher potential losses or limited liquidity. The Fund is not suitable for an investor who cannot accept any loss of their capital.</p> <p>There are risks involved in the Fund, which may include the following:</p> <ul style="list-style-type: none"> ● UK residential property risks ● Rental income risk ● Liquidity risk ● Financing risk ● Valuation risk ● General investment risks
Medium	Not in target market	
High	In target market	
Very high	In target market	
Extremely high	Not in target market	

Consumer's need to access capital

Within one week of request	Not in target market	<p>Investors should understand that the Fund is an illiquid investment. The Fund has no fixed termination date.</p> <p>Investors have a limited right to withdraw from the Fund. For each calendar quarter, redemptions will be limited to 2.5% of Units outstanding at the end of the preceding calendar quarter (with a 6 month notice requirement). If redemptions would result in the Fund exceeding the applicable limit on redemptions, the Responsible Entity will endeavour to satisfy requests on a pro rata basis. Any redemption requests not executed in full will be automatically carried over to the Redemption Date for the next calendar quarter. Should a large number of investors of the Fund decide to redeem, the Fund could be forced to liquidate investments prematurely, causing losses to the Fund.</p> <p>Once a redemption request is accepted in part or in whole, the period to satisfy redemption requests is generally within 325 Calendar Days but may be materially longer up to 730 calendar days where redemptions are suspended. The Responsible Entity can deny a withdrawal request in whole or in part. While investors will have restricted redemption rights, the Fund is an illiquid investment, and investors should not rely on this restricted redemption offers as a means of liquidity.</p>
Within one month of request	Not in target market	
Within three months of request	Not in target market	
Within one year of request	In target market	
Within 5 years of request	In target market	
Within 10 years of request	In target market	
10 years or more	In target market	
At issuer discretion	Not in target market	Not applicable.

Distribution conditions/ restrictions

Distribution conditions	Distribution condition rationale	Distributors this condition applies to
<p>Suitable for retail distribution through dealing if distributor is reasonably satisfied that distribution is necessary to implement personal advice given to the consumer.</p> <p>Suitable for retail distribution through investment, super or wrap platforms, and investor directed portfolio service (IDPS) or IDPS-like scheme or other trading platform. The issuer of each platform product has its own obligations as a distributor to take reasonable steps that will or are reasonably likely to result in retail product distribution conduct being consistent with this TMD.</p> <p>Suitable for direct application by retail investors. Retail investors who apply directly via the unit registry must complete consumer attribute questions contained within the application form to identify the purpose of their investment.</p> <p>The fund is intended for advised investors only. All investments must be made following personal financial advice.</p>	<p>The Issuer considers that the distribution condition will make it likely that investors who acquire the product will be in the target market for the product, or the product will otherwise be appropriate for them because persons providing personal advice must consider the consumer's individual circumstances and comply with the best interests' duty and related obligations under Pt 7.7A of the Corporations Act.</p> <p>This distribution condition will make it likely that the Issuer can identify if the product is being effectively distributed with the target market and assess if a significant dealing event has occurred.if a significant dealing event has occurred.</p>	All distributors

Review triggers

Material change to key attributes, fund investment objective and/or fees.
Material deviation from benchmark / objective over sustained period.
Key attributes have not performed as disclosed by a material degree and for a material period.
Determination by the issuer of an ASIC reportable Significant Dealing.
Material or unexpectedly high number of complaints (as defined in section 994A(1) of the Act) about the product or distribution of the product.
The use of Product Intervention Powers, regulator orders or directions that affects the product.

Mandatory TMD review periods	
Review Period	Maximum period for review
Initial review	24 months
Subsequent review	24 months

Distributor reporting requirements		
Reporting requirement	Reporting period	Which distributors this requirement applies to
Complaints (as defined in section 994A(1) of the Act) relating to the product. The distributor should provide all the content of the complaint, having regard to privacy.	As soon as practicable but no later than 10 business days following end of calendar quarter.	All distributors
Significant dealing outside of target market, under section 994F(6) of the Act. See Definitions for further detail.	As soon as practicable but no later than 10 business days after distributor becomes aware of the significant dealing.	All distributors

If practicable, distributors should adopt the FSC data standards for reports to the issuer. Distributors must report to the Issuer using the method specified on this website: www.eqt.com.au/DDOreporting. Distributors must report to the Issuer by contacting DDOCompliance@eqt.com.au.

Issued by Equity Trustees Limited ABN 46004031298 AFSL 240975 (Issuer). Issuer is the responsible entity and issuer of units in the managed investment scheme referred to in this material. This material provides general information only and does not take into account your individual objectives, financial situation, needs or circumstances. Before making any investment decision, you should assess whether the material is appropriate for you and obtain financial advice tailored to you having regard to your individual objectives, financial situation, needs and circumstances. This material is not a financial product recommendation or an offer or solicitation with respect to the purchase or sale of any financial product in any jurisdiction.

Definitions

Term	Definition
Consumer's investment objective	
Capital Growth	The consumer seeks to invest in a product designed or expected to generate capital return over the investment timeframe. The consumer prefers exposure to growth assets (such as shares or property) or otherwise seeks an investment return above the current inflation rate.
Capital Preservation	The consumer seeks to invest in a product designed or expected to have low volatility and minimise capital loss. The consumer prefers exposure to defensive assets that are generally lower in risk and less volatile than growth investments (this may include cash or fixed income securities).
Income Distribution	The consumer seeks to invest in a product designed or expected to distribute regular and/or tax-effective income. The consumer prefers exposure to income-generating assets (this may include high dividend-yielding equities, fixed income securities and money market instruments).
Consumer's intended product use (% of Investable Assets)	
Solution/Standalone (up to 100%)	The consumer may hold the investment as up to 100% of their total <i>investable assets</i> . The consumer is likely to seek a product with <i>very high</i> portfolio diversification.
Major allocation (up to 75%)	The consumer may hold the investment as up to 75% of their total <i>investable assets</i> . The consumer is likely to seek a product with at least <i>high</i> portfolio diversification.
Core Component (up to 50%)	The consumer may hold the investment as up to 50% of their total <i>investable assets</i> . The consumer is likely to seek a product with at least <i>medium</i> portfolio diversification.
Minor allocation (up to 25%)	The consumer may hold the investment as up to 25% of their total <i>investable assets</i> . The consumer is likely to seek a product with at least <i>low</i> portfolio diversification.
Satellite allocation (up to 10%)	The consumer may hold the investment as up to 10% of the total <i>investable assets</i> . The consumer may seek a product with <i>very low</i> portfolio diversification. Products classified as <i>extremely high</i> risk are likely to meet this category only.
<i>Investable Assets</i>	Those assets that the investor has available for investment, excluding the residential home.
Portfolio diversification (for completing the key product attribute section of consumer's intended product use) Note: exposures to cash and cash-like instruments may sit outside the diversification framework below.	
Very low	The product provides exposure to a single asset (for example, a commercial property) or a niche asset class (for example, minor commodities, crypto-assets or collectibles).
Low	The product provides exposure to a small number of holdings (for example, fewer than 25 securities) or a narrow asset class, sector or geographic market (for example, a single major commodity (e.g. gold) or equities from a single emerging market economy).
Medium	The product provides exposure to a moderate number of holdings (for example, up to 50 securities) in at least one broad asset class, sector or geographic market (for example, Australian fixed income securities or global natural resources).

Term	Definition
High	The product provides exposure to a large number of holdings (for example, over 50 securities) in multiple broad asset classes, sectors or geographic markets (for example, global equities).
Very high	The product provides exposure to a large number of holdings across a broad range of asset classes, sectors <u>and</u> geographic markets with limited correlation to each other.
Consumer's intended investment timeframe	
Minimum	The minimum suggested timeframe for holding the product. Typically, this is the rolling period over which the investment objective of the product is likely to be achieved.
Consumer's Risk (ability to bear loss) and Return profile	
<p>This TMD may use the Standard Risk Measure (SRM) as an input to the assessment of the risk and return profile of the product, but may not necessarily be the only input used. The SRM estimates the likely number of negative annual returns for a product over a 20 year period. The SRM may be supplemented by other risk factors, such as the potential size of a negative or positive return, liquidity or withdrawal limitations, underlying investments with valuation risks or risks of capital loss, the use of leverage or short selling, or otherwise may have complex structures. A consumers desired product return profile will generally take into account the impact of fees, costs and taxes.</p>	
Low	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a conservative or low risk appetite, • seeks to minimise volatility and potential losses (e.g. has the ability to bear up to 1 negative return over a 20 year period (SRM 1 to 2)), and • is comfortable with a low target return profile. <p>The consumer typically prefers stable, defensive assets (such as cash).</p>
Medium	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a moderate or medium risk appetite, • seeks low volatility and potential losses (e.g. has the ability to bear up to 4 negative returns over a 20 year period (SRM 3 to 5)), and • is comfortable with a moderate target return profile. <p>The consumer typically prefers defensive assets (for example, fixed income).</p>
High	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a high risk appetite, • can accept high volatility and potential losses (e.g. has the ability to bear up to 6 negative returns over a 20 year period (SRM 5 or 6)), and • seeks high returns (typically over a medium or long timeframe). <p>The consumer typically prefers growth assets (for example, shares and property).</p>
Very high	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a very high risk appetite, • can accept very high volatility and potential losses (e.g. has the ability to bear 6 to 7 negative returns over a 20 year period (SRM 6 or 7)), and • seeks very high returns (typically over a medium or long timeframe). <p>The consumer typically prefers high growth assets (such as high conviction portfolios, hedge funds, and alternative investments).</p>

Term	Definition
Extremely high	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has an extremely high risk appetite, • can accept extremely high volatility and potential losses (eg. has the ability to bear more than 7 negative returns over a 20 year period), and • seeks to maximise returns (potentially in a short timeframe). <p>The consumer seeks extremely high risk, speculative or complex products which may have features such as significant use of derivatives, leverage or short positions or may be in emerging or niche asset classes (for example, crypto-assets or collectibles).</p>
Consumer's need to access capital	
<p>This consumer attribute addresses the likely period of time between the making of a request for redemption/withdrawal (or access to investment proceeds more generally) and the receipt of proceeds from this request under ordinary circumstances. Issuers should consider both the frequency for accepting the request and the length of time to accept, process and distribute the proceeds of such a request. To the extent that the liquidity of the underlying investments or possible liquidity constraints (e.g. ability to stagger or delay redemptions) could impact this, this is to be taken into consideration in aligning the product to the consumer's need to access capital. Where a product is held on investment platforms, distributors also need to factor in the length of time platforms take to process requests for redemption for underlying investments. Where access to investment proceeds from the product is likely to occur through a secondary market, the liquidity of the market for the product and likely realisable value on market should be considered, including in times of market stress.</p>	
Distributor Reporting	
Significant dealings	<p>Section 994F(6) of the Act requires distributors to notify the issuer if they become aware of a significant dealing in the product that is not consistent with the TMD. Neither the Act nor ASIC defines when a dealing is 'significant' and distributors have discretion to apply its ordinary meaning. The issuer will rely on notifications of significant dealings to monitor and review the product, this TMD, and its distribution strategy, and to meet its own obligation to report significant dealings to ASIC.</p> <p>Dealings outside this TMD may be significant because:</p> <ul style="list-style-type: none"> • they represent a material proportion of the overall distribution conduct carried out by the distributor in relation to the product, or • they constitute an individual transaction which has resulted in, or will or is likely to result in, significant detriment to the consumer (or class of consumer). <p>In each case, the distributor should have regard to:</p> <ul style="list-style-type: none"> • the nature and risk profile of the product (which may be indicated by the product's risk rating or withdrawal timeframes), • the actual or potential harm to a consumer (which may be indicated by the value of the consumer's investment, their intended product use or their ability to bear loss), and • the nature and extent of the inconsistency of distribution with the TMD (which may be indicated by the number of red and/or amber ratings attributed to the consumer). <p>Objectively, a distributor may consider a dealing (or group of dealings) outside the TMD to be significant if:</p> <ul style="list-style-type: none"> • it constitutes more than half of the distributor's total retail product distribution conduct in relation to the product over the quarter, • the consumer's intended product use is <i>solution/standalone</i>, • the consumer's intended product use is core component or higher and the consumer's risk/return profile is <i>low</i>, or • the relevant product has a green rating for consumers seeking <i>extremely high</i> risk/return.
